EDUCATION

Cal State Fullerton

Bachelor of Science in Computer Science

Fullerton, CA

Aug. 2023 – Present

EXPERIENCE

Software Engineering Fellow

Jul. 2024 – Sep. 2024

HeadStarter

Remote

- Developed 5+ AI Apps utilizing Next.JS, OpenAI, Pinecone, Stripe API with 98% accuracy.
- Constructed projects from design to deployment alongside 4+ engineering fellows using MVC patterns.
- Coached by Amazon, Bloomberg, and Capital One engineers on Agile, CI/CD, Git, and microservice patterns.
- Conducted code reviews on peer submissions, ensuring 100% adherence to best practices, leading to a 15% improvement in code quality.

PROJECTS

TIF Reader | *Python*

Dec. 2024

- Designed a Python-based system that reads TIF files integrated with OCR, automating document sorting and processing.
- Orchestrated an innovative solution for automated document sorting which enhanced workflow efficiency; achieved clarity in organizing over 5,000 digital files with minimal need for manual oversight.
- Diminished manual data entry workload by over 20 hours weekly for team members handling documentation tasks.

Clear Cosmetics | *MLH* | *Next.js, Flask, Chroma, OpenAI API, TypeScript*

Aug. 2024

- Created an AI-driven application using OpenAI's GPT-3.5 to provide consumers with transparent insights into cosmetic products.
- Built a responsive full-stack solution, offering a user-friendly interface for informed purchasing decisions.
- Implemented a successful RAG (Retrieval-Augmented Generation) system, to ensure accurate product information.

C&C Jewelry | *OpenAI Vision, Flask, React.js, Typescript, BackBlaze, Supabase*

Jun. 2024

- Built an e-commerce website utilizing OpenAI's vision model, reducing product data entry time by 30%.
- Displayed products to users with dynamically updated information, increasing user engagement by 40%.
- Implemented CRUD operations with a Supabase database, streamlining product management.
- Enhanced productivity for the business owners by reducing manual data entry and optimizing pricing.

ACTIVITIES

Association for Computer Machinery (ACM)

Sep. 2023 – Present

Open Source Software Officer

Fullerton, CA

- Led a project overseeing 6 student developers, guiding their contributions to various projects.
- Coordinated team efforts using front-end techniques and the Svelte framework to enhance user experience.
- Conducted weekly progress meetings, ensuring 100% project completion and meeting all deadlines.

TECHNICAL SKILLS

Languages: Python, C++, JavaScript

Frameworks: Flask, React.js, Node.js, Django, Vue.js, SvelteKit

Databases: SQLite, PostgreSQL, MongoDB, Pinecone, Chroma

Libraries: Pandas, NumPy, Matplotlib, BeautifulSoup4
